- Small bag for pump

Battery Safety Instructions

- **DANGER OF EXPLOSION!** Do not expose batteries or appliances to extreme temperature such as from direct sunlight or fire. Do not place the product on a heating source.
- The batteries must be removed from the appliance before it is scrapped. Do not remove the built-in battery yourself! Bring the appliance to a qualified professional.
- The batteries are to be disposed of safely.
- Remove the charging cable from the appliance as soon as Li-ion battery is fully charged. Do not leave the appliance plugged in for an extended amount of time.
- This appliance must only be supplied at safety extra low voltage corresponding to the marking on the appliance.
- Recharge the build-in Li-ion battery within 6 months again

Operating instructions

1. Choose a suitable nozzle. Install only one nozzle each time.
2. Double click the "Switch" to switch on.
3. Click the "Switch" once to switch off.
4. Press and hold the camping light switch firmly for 3 seconds to switch on the LED light.

Low battery

When the red light is on, it indicates the battery is less than 5%. It needs to be charged in time.

The charging time is 2h for fully charged.

NOTE!

- Do not block the inlet or outlet during operation!
- The functions of this product cannot be used during charging.

Discarding & Environment

When decommissioning the appliance, the product must not be disposed of with other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point. Failure to follow this rule may be penalized in accordance with applicable regulations on waste disposal. The separate collection and recycling of your waste equipment at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

For more information about where you can drop off your waste for recycling, please contact your local waste collection company. The manufacturers and importers do not take responsibility for recycling, treatment and ecological disposal, either directly or through a public system.

Please non-destructively separate spent batteries and accumulators that are not enclosed in the used equipment, as well as lamps that can be removed from the used equipment without destroying it, from the used equipment before returning it at a collection point. Unless the used equipment is separated in order to prepare it for re-use.
