

Convection steam oven NANO digital 12x GN1/1

223086

Housing and chamber made of high-quality stainless steel. Digital water regulation with direct injection, steam is generated by dripping water on the heaters. The steam level is controllable, settable in percentages. Fitted with a direct water connection: 3/4", max 30°C, 150-200 kPa (2 bar), only use filtered and softened water. Chamber equipped with a drain in the bottom. Each powerful fan has 6 blades, ideally distributing the airflow in the chamber and preventing turbulence. The door is easy to open and lock with the large door handle. Door contains two tempered glass panes, the outside glass remains cool to the touch thanks to gravity ventilation. The removable door gasket is fitted to the chamber to ease cleaning and replacement. Chamber has LED lighting, and the tray guides are removable.
