

Electronic water flow meter for HENDI Water filters

code: 237915

After setting the filter capacity from 0 to 9900 L, the meter tracks the remaining filter output.

Can be set to display the remaining operating time from 0 to 720 days.

Display also shows the current water flow in L/min.

3 audible alarms indicate:

- Remaining filter output below 113 L or less than 7 days.
- Remaining filter output reaching 0 L or 0 days.
- Low battery level.

Designed for vertical installation.

Battery-powered; 2 AAA batteries included.

Suitable for 3/8" female or male connectors.

- + Tracks remaining filter capacity to support timely filter replacement.
- + Displays current water flow in L/min and remaining operating time up to 720 days.
- + 3 audible alarms indicate low capacity, filter exhaustion and low battery.
- + Battery-powered design with 2 AAA batteries included.
