Soup kettle **code: 860502**

Housing made of polypropylene.

Inner pot made of 18/8 stainless steel.

Water pan made of aluminium for efficient heat transfer.

Removable lid made of BPA-free material, with an insulated handle and ladle recess.

Temperature control from 65°C to 95°C, adjustable in 1°C increments.

Thermal insulation helps reduce energy use and keeps the outer housing cool.

Digital control panel with display showing both set and current temperature.

Overheating protection with low water level alarm.

Ring for safe and easy removal of the inner pot.

Integrated card holder in the lid for soup labelling.

- + Temperature adjustable in 1°C increments for precise control.
- + Insulated design helps reduce energy use while keeping the exterior cool to the touch.
- + Removable pot and support ring allow safe and easy handling during use.
- + Digital display provides clear temperature monitoring at a glance.
