Embossed vacuum bags code: 971031

2-ply, inside layer 60 µm food contact approved Polyethylene, outside layer 15µm Polyamide (Nylon).

Total thickness is 75 μm .

Embossing improves the air flow out of the bag during the vacuum packing process.

Bags can be used in temperatures from -20° up to 100° C.

Suitable for chamber and external vacuum packing machines.

Code	Packed per	LxW (W)
